

Hi Tomas congratulations, your first title , your first ATP title, how does it feel?

Thank you si much, it feels great because this moment that's why you work so hard to achieve this thing, so it means a lot for me and the performance of this great match today , specially as I was so nervous of course, so I handled it pretty well from the beggining until the end and happy I can lift this trophy.

Hi Arturo Sándino from Acir Deportes, How do you describe this week and your first title? Its great because because I was playing with this chech guy and he is playing great and it was a tough draw for me and because I was feeling very good since the beginning and knowing it was going better and better and it means a lot for me specially when I was arriving from UTS and the conditions there were totally different and I was a little bit, of course each player had some injuries so I had to handle this types of things during the tournament and I handle it pretty well.

Tomas , Jorge Rodrigo from Marca, congratulations in your win . How can you compare this win to the Olympic in Paris ? Its something different because it was for doubles specially mix so these is competed differently, so for me to achieve gold medal doesn't máster what is it , if its singles or double so this moment was something different I think I will not have those feelings again. if I dont win in again , si this is something different for me to win am ATP title , I wouldnt say it was goal but of course as a tennis player, everybody has these goals but its not like I was dreaming to win an ATP title since six years ago, I was happy being in the Top 100 , then goals and everything was going up more and more , so I have it like that.
